Subject Index

- Adhesion molecules 57
- AIDS 25, 341, 371, 391
- alpha/beta T cells 477
- antibodies 371, 555
- antigen presentation 409
- antiretroviral therapy 305
- appendix 421
- astrocytes 35
- autoantigens 35
- autoimmunity 51, 535

- B lymphocytes** 371, 555
- B. burgdorferi* 25
- blood brain barrier 35, 57

- Cancer 185, 211, 227
- cancer therapy, monoclonal antibodies 243
- CC CKR-5 β -chemokine receptors 323
- CD8 cells 355
- CD8-cell factor, HIV 345
- celiac disease 407, 535
- cellular immunity, HIV 355
- central nervous system, infection 25
- chemokines 355
- chimeric receptors 199, 211
- class I MHC associated peptides 171
- complement 371
- complement activation 555
- CTL epitopes 341
- cytokines 57, 227, 555

- Delayed-type hypersensitivity 125
- demyelinating diseases 1
- demyelinating disease, superantigens 51
- demyelination 97
- dendritic cells 371, 407, 409

- Encephalitis 25
- epithelial cells 407, 477
- epithelium 449
- experimental allergic encephalitis (EAE) 1
- experimental allergic neuritis (EAN) 97
- experimental encephalomyelitis 51

- Gamma/delta T cells 477
- gangliosides 97
- gastritis 407, 495
- gastrointestinal tract
- gene therapy 149, 211
- gluten 535
- gluten-sensitive enteropathy 535
- glycolipid antibodies 97
- glycosylation 371
- Guillain-Barré syndrome 97

- H₂O₂** 227
- helicobacter pylori 495
- , immunopathology 495
- , vaccines 495
- human immunodeficiency virus (HIV) 25, 253, 257, 371, 391, 421
- , transmission 323
- , antiretroviral therapy 305
- , CD8-cell factor 345
- , cellular immunity 355
- , cytotoxic T lymphocytes 341
- , dynamics 267
- , immunology 285
- , immunopathogenesis 253
- , lymphoid tissue 305
- , natural host 391
- , pathogenesis 267, 285, 391
- , primary infection 257
- , resistance to 323
- , role of complement 371
- , virus escape 257, 260
- , virus suppression 355
- HIV-1 355

- IgA** 421, 555
- IgG subclasses** 555
- immune neuropathies 97
- immune response 371
- immune suppression 227
- immunity 97
- , mucosal 449
- immunopathology
- , mucosal, Vol. 18, no. 4
- immunotherapy 149, 199
- , MS 1
- infection, CNS 25
- infectious disease 211
- inflammation 57
- inflammatory bowel disease 407, 421, 555
- interferon- β 125
- intestinal immunity 463
- intestinal mucosa 449
- intestine 409, 421, 515
- intraepithelial lymphocytes (IEL) 463
- , development 463
- -, extrathymic 463
- isolated neuropathy, NA 78

- Lamina propria** 409
- Lyme disease 25

- lymph nodes 371
- lymphocytes 407
- lymphoid tissue, HIV 305
- M cells** 421
- macrophages 555
- MAGE gene 185
- Melan-A/MART-1 185
- melanoma 185
- meningitis 25
- MHC molecules, class I 171
- microbial pathogenesis 421
- microglia 35
- migration, T lymphocytes 35
- monoclonal antibodies 242
- , cancer therapy 243
- mucosa 407
- mucosal immunity 421, 515
- multiple sclerosis (MS) 1, 51, 125
- , immunotherapy 1
- myelin 97
- Necrotizing arteritis (NA)** 75
- , isolated neuropathy 78
- , rheumatoid arthritis 75
- nerve 97
- nervous system 35
- neurologic paraneoplastic syndromes 85
- Peyer's patches** 409, 421
- phagocytosis 371
- poliovirus 421
- polyarteritis nodosa (PAN) 75
- primary vasculitis 76
- progressive multifocal leukoencephalopathy 25
- Reovirus**
- retinoic acid 125
- rheumatoid arthritis
- , necrotizing arteritis 75
- Salmonella** 421
- Schwann cells 97
- secretory IgA 477
- secretory immunity 515, 555
- Shigella 421
- signal transducing zeta chains 227
- simian immunodeficiency virus (SIV) 391
- superantigens 51
- T cell receptors (TCR)** 185
- T cells 35, 125, 515, 555
- , targeting 211
- , tumor-specific 199
- , migration 35
- T lymphocytes, cytolytic (CTL) 171, 185
- T lymphocytes, cytotoxic 244, 341, 463
- Th1, Th2 cytokines 477
- thymus 463
- tonsillitis
- tropism 371
- tumor antigen 171, 185
- tumor-associated antigen 244
- tumor-specific T cells 199
- tyrosinase 185
- Vaccination** 244
- vascular endothelium 555
- vasculitis, diagnosis 81
- virus suppression, HIV 355
- virus 25
- Yersinia** 421
